Health Warning :

According to data reported in VAERS, reproduced here, adverse events triggered by Moderna batches outside the USA have varied widely.

70% of the batches are associated with only 1 or 2 deaths per batch, but a small % of the batches appear to be more toxic - being associated with 10 x, 20 x, 30 x the number of deaths compared to the less harmful 70% of the batches.

Therefore, members of the public should be wary of the batch they are receiving, and doctors and nurses should ALWAYS check the batch number before administering it, to see if it is associated with an excessive number of deaths, disabilities or life threatening illnesses.

Check out your Moderna batch code
