## Health Warning :

According to data reported in VAERS, reproduced here, adverse events triggered by Janssen batches have varied widely.

70% of the batches are associated with only 1 or 2 deaths per batch, but a small % of the batches appear to be more toxic - being associated with up to 88 x the number of deaths compared to the less harmful 70% of the batches.

Therefore, members of the public should be wary of the batch they are receiving, and doctors and nurses should ALWAYS check the batch number before administering it, to see if it is associated with an excessive number of deaths

## Check out your Janssen batch code
